

LANDSCAPE WATER ALLOWANCE WORKSHEET

Project Name: _____
Project Address: _____

Landscape Water Allowance

A. Total Irrigated Landscaped Area (square feet)	<div></div>
	X
B. Annual ET_0 for Landscaped Area (inches per growing season)	<div></div>
	X .62
C. Landscape Water Allowance (gallons per growing season)	<div></div>

Instructions

Landscape Water Allowance

- Enter the total square footage of Irrigated Landscaped Area in the project.
- Enter the average growing season Reference Evapotranspiration (ET_0) for the landscaped area. For Salt Lake County the ET_0 is 31.18.
- Calculate the Landscape Water Allowance for the project by multiplying the total square footage shown in Box A by the annual ET_0 in Box B and by .62 (conversion factor from inches of water to gallons).
